

# SLIDING KOMFORT LATCH®

## Breakthrough in Seatbelt Comfort

Sliding Komfort Latch removes seat belt irritation and gives the driver a greater range of movement with the push of a button.

- Easy to use
- Improves seat belt comfort
- Greater freedom of movement
- Seat belt comfort → belt usage → driver safety

IMMI's original Komfort Latch, the yellow clip on the seat belt at the drivers shoulder, was introduced in 1986 to decrease uncomfortable seat belt lockups. Today it is found on over 90% of all heavy trucks in North America and since the Komfort Latch's introduction seat belt usage in large trucks has climbed from 5% to over 60%.
