TRUSTED. PROVEN. UNSURPASSED.®

First responders are there for us. IMMI® is there for them.

We create products that give firefighters a better chance of walking away from all kinds of crashes. Our safety systems are designed to be hassle-free, comfortable, and to save precious time while protecting firefighters and other first responders..

Our team of safety engineers not only designs new products to protect the nation's firefighters, but rigorously tests those products at CAPE®, our state-of-the-art crash test facility, to ensure they meet, and often exceed, the highest standards for safety.

RollTek®

Fire apparatuses are more likely to overturn because they're top heavy. That's why more and more fire departments want their trucks equipped with RollTek. With motor vehicle crashes being the second leading cause of line-of-duty deaths for firefighters, concerned fire chiefs across the country choose RollTek to give their men and women the side-roll airbag protection they deserve. Available through most OEMs.

4Front®

In moderate to severe crashes, frontal airbags can mean the difference between life and death. When 4Front senses a collision, it tightens the seat belts around the driver and the first officer, pulls down the suspension seats to increase survivable space, and inflates a steering wheel airbag to protect the head and neck of the driver, while inflating a knee bolster airbag to protect the first officer's knees.

SmartDock®

When seconds count, don't waste them fighting your gear. With SmartDock, the preferred hands-free SCBA holder for firefighters, there are no cords or levers to slow you down. In a collision, the top claws clamp down, preventing the SCBA from becoming a projectile. Engineered to fit most SCBAs, SmartDock can also be easily retrofitted to a wide variety of seats.

ReadyReach®

Bulky gear often makes it difficult to buckle up, and the hassle often discourages use and puts firefighters at risk. ReadyReach is the solution. Easy to see, and easy to use, ReadyReach allows firefighters to grab their seat belts and buckle up one-handed.

Tie-Downs

Fire boats, ATVs, and utility vehicles help fire departments respond to alarms in all kinds of environments, from water emergencies to off-road distress calls. In a job where seconds can save a life, they need their gear to be quick to launch and easy to transport. With CargoBuckle® and BoatBuckle®, fire departments have fast, convenient tools that are there when they need them and out of the way when they don't. Emergency responders simply hook, ratchet, and go!

Talk to your dealer about any of these innovative products for your next apparatus, or learn more about BoatBuckle and CargoBuckle at IMMIOutdoors.com.

IMMI reminds you to always buckle up.
