Safety Within Reach.

Putting on a seat belt can be tough when you're in full turnout gear, but IMMI's ReadyReach is the solution. With bright webbing that makes the belt easy to see and extensions that make them easier to grab and secure, firefighters can buckle up one-handed and hassle-free with ReadyReach.

In an effort to improve seat belt usage and the safety of their firefighters in the apparatus, the FDNY outfitted their entire fleet with ReadyReach and awarded IMMI a special commendation for safety for creating the system.

ReadyReach meets all applicable FMVSS and NFPA 1901 standards.

READYREACH[®]

TRUSTED. PROVEN. UNSURPASSED[®]

Easy to See. Easy to Use.

ReadyReach comes standard on Pierce and is available on the following OEMs in select models as an option: Seagrave, KME, E-One, Ferrara.

ReadyReach can not be retrofitted on most vehicles.

Contact your dealer representative for more information or to spec ReadyReach on your new fire apparatus.

Firefighters should worry about fighting fires, instead of fighting with their seat belt.

How it Works:

- An extender arm places the belt in a closer, easier to reach location.
- Longer stalks improve access to the buckle.
- Your choice of orange or red webbing increases the visibility of the belt.

IMMI reminds you to always buckle up.
