

imminet.com

IMMI® is honored to protect those who serve.

From seat belts to stowage to side-roll airbag protection systems, IMMI's products are tested beyond regulatory requirements, enabling us to deliver dependable, durable, high-quality safety systems to our Defense customers. IMMI offers a proven line of products created to advance the survivability of our troops and to help them perform their duties faster and more efficiently.

ADVANCING SURVIVABILITY®

## Rotary Buckles

4-, 5-, and 6-point rotary buckles available.

## Click6®

The next evolution in seat belt safety with six points of protection and one point of connection.

## RollTek®

RollTek is an advanced side-roll airbag protection system designed to keep warfighters, firefighters, truckers, and paramedics safer in a rollover.

## Cargo Securement

CargoBuckle retractable ratcheting tie-down makes it easier to tie down more equipment in more applications quickly and securely. Just Hook, Ratchet, and Go!

As the Industry Leader,  
We Drive Safety.

## What sets us apart:

CAPE®, the Center for Advanced Product Evaluation, offers a wide range of testing options for defense applications and you can depend on us to provide you with precise results quickly, efficiently, and confidentially.

Testing capabilities include: barrier crash testing, 90-degree rollover impact machine, drop tower, applied mechanics, roof crush, dynamic testing/custom tests, and more.

Drop tower test

Roll test
