IMMI's Mark Campbell Named to 2019 Tobias Leadership Fellows Program

April 23, 2019

(Westfield, Indiana) – The Randall L. Tobias Center for Leadership Excellence at Indiana University recently announced their 2019 class of Tobias Fellows, and IMMI's Mark Campbell, Senior Vice President of Global Operations, is among them.

The program is an exclusive group gathered to enhance the leadership skills of high talent, experienced leaders. Mark and his other twenty Fellows will meet for ten sessions throughout the year for innovative programming designed to develop unique insights into complex issues facing executive-level leaders. The ability to interact with other executives from public, private, nonprofit, and academic sectors with experience in civic and organizational leadership is the unique niche of the program. The Tobias Leadership Center focuses on developing the theory and practice of leaders prepared to examine and confront the challenges of innovation, impact, and inclusion on their organizations and communities.

Housed on the IUPUI campus, the Tobias Leadership Center is a collaboration among the Kelley School of Business, Lilly Family School of Philanthropy, School of Public and Environmental Affairs and School of Education at Indiana University.

Mark Campbell has been with IMMI since 1988 and has held seven notable positions during his tenure including Manufacturing Engineering Manager and Operations Manager of CAPE (the Center for Advanced Product Evaluation). Mark is a member of the Society of Manufacturing Engineers and the Association for Manufacturing Excellence and completed the IU Kelly School of Business' Kelly Partnership and Leadership Development program among his various supply chain and lean certifications.

About IMMI: IMMI® is the trusted, global leader of safety solutions, helping to protect millions of lives every day. For almost sixty years, IMMI has led the way in developing, designing, testing and manufacturing innovative safety restraints and systems. IMMI's safety products are found worldwide on car seats, heavy trucks, school buses, recreational/off road, military, fire/EMS, motor coach, and construction vehicles. Privately owned, headquartered in Westfield, Indiana and operating seven additional global facilities, IMMI is also home to CAPE®, the world's leading state-of-the-art testing facility.
