Decal Installation

- IMMI decals alert rescue workers that the vehicle is equipped with IMMI advanced occupant restraints.

- The IMMI system includes components that can pose a safety risk to rescue workers during the extrication process. IMMI decals assist rescue workers in locating these components.

- Read the following instructions and install the decals as outlined in steps 1 thru 5. Be sure the areas are clean and dry, free of dirt, oil, wax and loose paint.

1. Peel strip on back of decal to expose adhesive.

2. Adhere two “IMMI SRS Equipped” decals on vehicle exterior, one beside the side doors and one near the back doors.

3. Adhere the “SRS System Locator” decal to the inhalation cabinet.

4. Apply decals firmly with the palm of hand, starting in the center and working outward to remove trapped air.

5. Wait 72 hours before washing the vehicle or exposing it to rain or excess humidity.

6. Place Emergency Response Guide with the owner’s manual in the vehicle.
