## The Belt that Loves the Elements as Much as You

High performance demands superior safety, and IMMI® delivers with our Severe Duty Retractor.

Brilliantly designed to keep out the elements, our seat belt does its job – no matter how much sand, mud, and muck you plow through. An added bonus is that our Severe Duty Retractor significantly reduces annoying and sometimes painful lockups to make for THE smoothest ride possible.

Safety shouldn't hurt. With our Severe Duty Retractor you get the most comfortable ride, and a belt that is as tough in the elements as you are.

SEVERE DUTY RETRACTOR WORK HARD, PLAY HARDER, AND COME HOME SAFE

# SEVERE DUTY RETRACTOR

As the Industry Leader,  
We Drive Safety.

## What sets us apart:

Until CAPE®, the Center for Advanced Product Evaluation, stepped in, very little crash testing had been done for the UTV market. They set out to change that and they succeeded. CAPE has crashed, smashed, and rolled a number of UTVs to test everything from vehicle integrity to harness and seat belt safety. Whether you use a UTV to play hard or work hard, CAPE is working to make them safer.

## Where other belts quit, ours won't.

In a side-by-side comparison with the industry standard, the IMMI Severe Duty Retractor locks out mud, dirt, and water. Not only does it hold up against physical elements, it withstands exposure to intense heat and cold.

The Severe Duty Retractor is safety gear that loves braving the elements and terrain as much as you do!

IMMI reminds you to always buckle up.
