SafeGuard 

## We've Got Your Back

SafeGuard offers the most extensive and versatile product line to meet your seating needs. When you're ready to move safety forward with lap-shoulder belts or integrated child seating, we give you more choices than ever before. SafeGuard FlexPlus® offers:

- SmartFrame Plus® – Protecting the belted and unbelted
- SafeGuard TattleTale® Technology – Visual identification when you need to replace your seat back
- Easy Upgradeable Backs to Lap-Shoulder Belts and ICS
- CAPE® Tested
- IMMI Quality Assurance

The SafeGuard FlexPlus meets or exceeds all FMVSS and CMVSS requirements and standards. Made exclusively for Thomas Built Buses.

Changing seat backs is easy!

## SafeGuard S3B Base School Bus Seat

### Restraint Ready

The S3B seating system is a light weight economical school bus seating system. Designed for applications where upgrading to a L-s belt or ICS configuration is not anticipated, the S3B has the same footprint as the S3C and can be mixed and matched with the S3C seats in the same bus.

## SafeGuard S3C

The SafeGuard S3C are designed for flexibility and convenience. Available in a wide variety widths, the S3C can accommodate up to three passengers and can be configured for wall, floor or track mounting.

The S3C meets all FMVSS and CMVSS requirements and can be easily converted into different seating solutions, such as the integrated child seat or the restraint seat. The S3C can be retrofit to any school bus body style and all Thomas buses.

### Easy to Maintain

- The zip-on back cover for rear panel can be quickly replaced without removing the seat belts.
- The self-latching seat cushion can be removed in seconds.
- A service parts catalog and maintenance diagrams are available online.
