Global Excellence

We are Bringing Safety to People® every day around the world. When it comes to the youngest among us, we believe protection begins on day one.

Leading the Way

IMMI is the pioneer in child seat safety. We have designed and manufactured child safety products used by parents all over the world. Our passion to keep children safer while on the road inspired IMMI products like the 5-point harness system, the 1 Adjust®, Mini-Connector, and MiniLATCH, which are used by leading child seat manufacturers globally. So the next time you secure your child into a child seat, know that IMMI is holding on tight to what matters most.

IMMI has over 60 years of experience and leadership providing the most innovative and dependable safety restraint systems. We are excited to offer a complete product line that serves customers in every part of the world.

Core Safety Components

For decades, IMMI has worked with car seat manufacturers to design innovative, **easy-to-use** harnesses and LATCH attachment systems that give parents the confidence that the child seat they've purchased meets or exceeds the highest standards in safety.

Our advanced restraint systems and safety components are engineered to make car seats less complicated for parents to use.

Leading car seat manufacturers choose IMMI safety products because they improve their NHTSA (National Highway Traffic Safety Administration) ease of use ratings. Ratings improve when the child is easily secured in the harness, the seat is easily connected to the vehicle, and the instructions are clearly labeled and accessible.

All IMMI products for Europe and Asia are ECE R44/04, R129, and GB27887 certified and meet or exceed standard safety requirements.

Product Development and Quality

IMMI offers the most trusted quality and advanced engineering to help child seating manufacturers develop innovative systems that bring the best in car seat technology to today's parents.

The industry's finest engineers at IMMI work together with OEM engineers to assist with conceptual designs to develop advanced restraint systems that meet ease of use requirements, and to conduct testing to prove the performance of their products.

IMMI Provides:

- IIVIIVII I I I OVIGES
- Complete system and/or component level testing capabilities on-site at IMMI with quick turnaround on test reports
- Applied mechanics: Nonlinear crash simulations using LS-Dyna
- CAD mechanical engineering software including Pro E, Ideas, UG
- Skilled engineers and in-house certified child passenger safety technicians
- In-house industrial design staff to assist with conceptual design for customers
- Facilities offering complete prototype build with rapid prototyping capabilities
- Meets ISO 14001 and TS-6949 quality certifications

Visit capetesting.com to see what it means to be "CAPE Tested"

Testing Services

IMMI is the home of an award winning, one-of-a-kind crash-test facility, CAPE® (Center for Advanced Product Evaluation), which brings together advanced technology and specialized engineering expertise to provide customers with analytical information to support their most complex decisions. CAPE has conducted more safety tests on child restraints than any other test facility in the world.

Testing Services for Child Seat Manufacturers:

- Development testing
- Durability testing
- Sled testing/motion analysis
- Child ATDs including:

P O, CAMH, CAMHII, P 3/4, SA103C, P 3, CRABII2, HIII10C, VIP6C, HIII6C, P 6, P 10, CRABII8, SA106C, P 1-1/2, HIII3C

- Confidential testing
- Testing to ECE R-44, R129 and AS1754
- Compliance testing to FMVSS 213 and CMVSS 213
- Vehicle side impact testing per FMVSS 214

dual-tongue BUCKLES

IMMI 5-point harness systems come in multiple configurations and are designed to meet all applicable worldwide safety standards including FMVSS 213, CMVSS 213, ECE R-44, R129, GB27887 and AS1754.

IMMI child seat buckles offer the latest in buckle technology and are designed to withstand the forces imposed by today's child car seat.

Meets Specifications for:

- FMVSS 213 | US (United States)
- ECE R-44, R129 | EU (Europe)
- AS1754 | AU (Australia)
- CMVSS 213 | CA (Canada)
- GB27887 | CN (China)

latch ATTACHMENTS

Combining strength and user-friendliness, the IMMI line of LATCH attachments makes car seat installation and removal easy.

IMMI offers a range of snap hook styles for use in LATCH systems.

The top tether slack indicator provides immediate feedback to the user regarding tether tension.

LOWER LATCH ATTACHMENTS

Mini-Connectors fasten to the vehicle's lower LATCH anchors in seconds with an audible click and are released easily with the push of a button. Mini-Connectors reduce misuse and help manufacturers achieve top NHTSA Ease of Use ratings.

IMPORTANT! Counterfeit Products

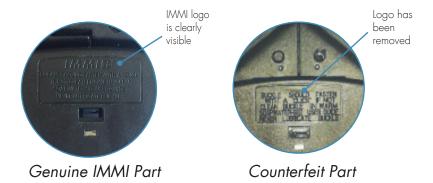

Counterfeit products can kill.

44

As the world's leading manufacturer and innovator of buckles, restraints, and other child safety products for car seats, we are challenged in trying to prevent fake products, sold under our brand, from entering the market. I/MMI has a combined history of providing the highest quality safety products in the car seat industry that protects literally tens of millions of children every day. Our products are vigorously tested, compliant with all regulatory standards, and are built with integrity.

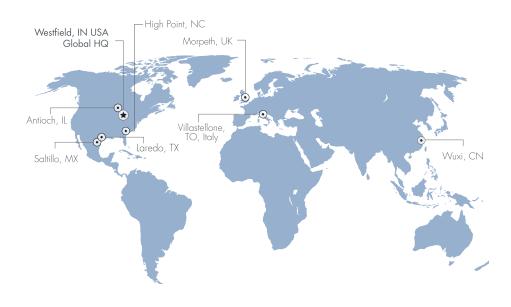

We are the experts in our field; however, the downside to having the most trusted brand name in the industry is that counterfeiters increasingly attempt to copy our products with sub-standard materials and workmanship. These fake products could lead to serious injuries, and even death. Your best protection against counterfeited safety products is to only purchase from an account manager, or representative of IVMI.

If you believe that you have seen counterfeit IMMI products, please contact us immediately: info@imminet.com
