Cover

More Comfortable
Flatter Base

Central Adjust
Tightens in One
Pull

The **SafeGuard SuperSTAR** is the only restraint engineered with the added safety of car-seat technology, while providing you with more versatility. The SuperSTAR's central adjust allows for an easier one-pull tightening of the restraint system.

- Designed and tested for 26.5-90 lb pre-school children.
- Easier to clean covering.
- Longer cam wrap attaches around any school bus seat.
- Seven year service life.
- Flatter base contours provides more comfort.
- Fits (3) SuperSTARs on a standard 39' FMVSS school bus seat.
- Optional chest strap available.
- CAPE Tested.

SafeGuard STARs Continue to Shine

SafeGuard STAR® restraints are trusted by more districts to provide adaptable child safety for school bus transportation. The five-point restraint systems make the proper and safe transportation of preschool, Head Start, and special needs children quick and easy. STAR restraints are intuitive, safely securing and adapting to children of a wide range of sizes and needs.

Our standard STAR add-on restraint system easily adjusts to provide a proper, secure fit for children 26.5 to 65 lbs., up to 57 inches tall, and over two years of age. Our standard STAR meets the majority of transportation needs.

STAR Special Needs

STAR Special Needs offers the same protection as the standard STAR, with the extra support accessories to accommodate children with a wide range of special health care needs. The restraint easily adjusts to provide support for children 26.5 to 105 pounds with torso heights up to 20 inches tall (torso height = seating position base to shoulder).

- Extra support features include an abductor, recline wedge, torso supports, height adjusters and adjustable headrests.
- Wraps around most any size school bus seat.
- Meets or exceeds all applicable federal and Head Start safety standards.

Testing

SafeGuard tests all of its school bus seating at The Center for Advanced Product Evaluation (CAPE®) - the only crash test facility of its kind in the world.

CAPE is equipped to handle the school bus testing of all shapes and size with the largest barrier block in the world as well as a 90 degree rollover machine designed for large commercial vehicles.

CAPE tests the most common standards: FMVSS 210, 222, and 225.
