

RollTek® for Ready Mix

Side Roll Airbag Protection

Side Roll Airbag (SRA)
Deploys to cushion head and neck

RollTek Sensor
Detects an unrecoverable roll and sets into motion a series of actions in a fraction of a second

Seat Belt Pretensioner
Keeps the driver and/or passenger in their seat

Suspension Seat
Is pulled down to its lowest level to increase survivable space

National Seat with RollTek

More than 50% of heavy truck driver fatalities happen in a rollover. That's more than HALF.

With a high center of gravity and a constantly shifting load, concrete mixers are at an increased risk for this kind of accident. That's why IMMI® created RollTek®, a side roll airbag protection system that can give your drivers a better chance to walk away from one of the worst kinds of crashes they can face.

RollTek - How It Works

A roll sensor monitors the truck's position, and when a rollover is detected, up to three RollTek components are deployed per seating position

1. Seat pretensioners keep the driver or front seat passenger securely in their seats.
2. Suspension seat is pulled down to its lowest level to increase survivable space in the cab.
3. Side airbag deploys to cushion the head and neck.

Availability

RollTek with the National Seat is available through these quality truck manufacturers:

Heavy Duty Truck

Western Star: 47X, 49X

International: HV Series, HX Series

Medium Duty Truck

International: HV Series, MV Series

Testing

IMMI extensively tests its safety products at CAPE, the premier testing house for the commercial truck industry.

Outdoor roll test
